Summary

Motivated MCA graduate in Computer Science with a strong foundation in Python, AI, and full-stack web development. Passionate about building scalable AI-powered applications and solving real-world problems. Skilled in deploying ML solutions, backend APIs, and automation systems for production environments.

Experience

Machine Learning Engineer Intern

Theax Company • June 2025 – Present

- Contributed to a production-ready web platform designed for managing and conducting hackathons.
- Focused on backend development and automation, ensuring a seamless user experience.
- Implemented GitHub integration, allowing code syncing, repo management, and evaluator access.
- Enhanced deployment readiness, backend APIs, and automation logic using Python and Flask.

Projects

News Sentiment Analyzer

Akaike Technologies • Mar 2025

- Built a web-based application to extract, summarize, and classify news sentiment using NLP techniques.
- Integrated Google News and GNews APIs for real-time news retrieval.
- Created RESTful APIs with Flask and a responsive frontend in Streamlit.
- Deployed on Hugging Face Spaces and Render with Hindi text-to-speech (gTTS).

Vitamin Deficiency Detector

Yenepoya University • Oct 2024 – Feb 2025

- Developed a DL-powered application to detect vitamin deficiencies from facial images.
- Used TensorFlow, OpenCV, and Flask for real-time analysis and diagnostic result delivery.
- Built a cross-platform UI for mobile and web.

Blood Bank Website

DVS College of Arts and Science • Jan 2022 – Oct 2022

- Built a donor-seeker matching platform with secure donor data handling.
- Integrated a donor lock mechanism to comply with medical standards.
- Tech Stack: HTML, CSS, JavaScript, PHP, Python, MySQL.

Education

Master of Computer Applications (MCA)

Yenepoya University, Mangalore • 2025 • GPA: 8.5

Bachelor of Science

Kuvempu University, Shivamogga • 2022 • 69%

Pre-University (PUC)

DVS Composite PU College, Shivamogga • 2018 • 68%

SSLC (10th)

Government Junior College, Nyamati • 2016 • 86.88%

Certifications & Coursework

JAVA Full Stack Developer – Q Spiders, 2023

- Trained in Java, SQL, JavaScript, HTML, CSS
- Hands-on experience developing responsive web pages and backend services

Skills

- Languages & Frameworks: Python, Flask, TensorFlow, OpenCV, Streamlit, PHP, JavaScript
- AI/ML: Deep Learning, Neural Networks, Image Processing, NLP
- Frontend: HTML, CSS, JavaScript
- Tools & Platforms: Git, GitHub, MySQL, Hugging Face, Render, gTTS, Google News API
